

Avonza
Tolterodine Dispersed Formate/Lamivudine Tablets
300 mg/300 400 mg

It has been demonstrated that the presence of CPD in tablets has an effect on the rate of absorption...

These results are not applicable to AVONZA. This is a tablet with a controlled release mechanism...

Tablet of any strength for Tolterodine Dispersed Formate/Lamivudine Tablets 300 mg/300 400 mg...

1. NAME OF THE MEDICAL PRODUCT

1.1 Trade name: Avonza
1.2 International non-proprietary name: Tolterodine Dispersed Formate/Lamivudine Tablets

2. QUALITATIVE AND QUANTITATIVE COMPOSITION

Each film-coated tablet contains:
Tolterodine Dispersed Formate 300 mg
Lamivudine 400 mg

For a full list of excipients, see section 6.1.

3. PHARMACOLOGICAL PROPERTIES

3.1 Therapeutic Indications

Avonza is indicated for the treatment of overactive bladder syndrome (OAB) in adults and adolescents...

3.2 Contraindications

Avonza is contraindicated in patients with known hypersensitivity to any of the active ingredients...

3.3 Special warnings and precautions for use

Avonza should be used with caution in patients with a history of urinary retention...

3.4 Interactions

There are no clinically significant interactions between Avonza and other drugs...

3.5 Pregnancy and lactation

There is no data on the use of Avonza in pregnant women...

3.6 Fertility

There is no data on the effect of Avonza on fertility...

3.7 Adverse reactions

The most common adverse reactions are dry mouth, constipation, and dizziness...

3.8 Laboratory tests

There are no known effects of Avonza on laboratory tests...

3.9 Tolerability

Avonza is well tolerated in clinical studies...

3.10 Overdose

In the event of an overdose, patients should be monitored for symptoms...

3.11 Under-reporting

Patients should be encouraged to report all adverse reactions...

3.12 Medication errors

Patients should be advised to read the patient information leaflet carefully...

3.13 Abuse and dependence

Avonza is not considered to have any potential for abuse or dependence...

3.14 Withdrawal symptoms

There are no known withdrawal symptoms associated with Avonza...

3.15 Driving and operating machinery

Avonza may cause dizziness, which may affect the ability to drive...

3.16 Sensitivity to the excipients

Avonza contains several excipients, some of which may cause allergic reactions...

3.17 Other information

Avonza is a controlled substance and should be stored securely...

3.18 Environmental impact

Avonza should be disposed of according to local regulations...

3.19 Other information

Avonza is a registered trademark of Mylan.

4. PHARMACOLOGICAL PROPERTIES

4.1 Therapeutic Indications

Avonza is indicated for the treatment of overactive bladder syndrome (OAB) in adults and adolescents...

4.2 Contraindications

Avonza is contraindicated in patients with known hypersensitivity to any of the active ingredients...

4.3 Special warnings and precautions for use

Avonza should be used with caution in patients with a history of urinary retention...

4.4 Interactions

There are no clinically significant interactions between Avonza and other drugs...

4.5 Pregnancy and lactation

There is no data on the use of Avonza in pregnant women...

4.6 Fertility

There is no data on the effect of Avonza on fertility...

4.7 Adverse reactions

The most common adverse reactions are dry mouth, constipation, and dizziness...

4.8 Laboratory tests

There are no known effects of Avonza on laboratory tests...

4.9 Tolerability

Avonza is well tolerated in clinical studies...

4.10 Overdose

In the event of an overdose, patients should be monitored for symptoms...

4.11 Under-reporting

Patients should be encouraged to report all adverse reactions...

4.12 Medication errors

Patients should be advised to read the patient information leaflet carefully...

4.13 Abuse and dependence

Avonza is not considered to have any potential for abuse or dependence...

4.14 Withdrawal symptoms

There are no known withdrawal symptoms associated with Avonza...

4.15 Driving and operating machinery

Avonza may cause dizziness, which may affect the ability to drive...

4.16 Sensitivity to the excipients

Avonza contains several excipients, some of which may cause allergic reactions...

4.17 Other information

Avonza is a controlled substance and should be stored securely...

4.18 Environmental impact

Avonza should be disposed of according to local regulations...

4.19 Other information

Avonza is a registered trademark of Mylan.

5. PHARMACOLOGICAL PROPERTIES

5.1 Therapeutic Indications

Avonza is indicated for the treatment of overactive bladder syndrome (OAB) in adults and adolescents...

5.2 Contraindications

Avonza is contraindicated in patients with known hypersensitivity to any of the active ingredients...

5.3 Special warnings and precautions for use

Avonza should be used with caution in patients with a history of urinary retention...

5.4 Interactions

There are no clinically significant interactions between Avonza and other drugs...

5.5 Pregnancy and lactation

There is no data on the use of Avonza in pregnant women...

5.6 Fertility

There is no data on the effect of Avonza on fertility...

5.7 Adverse reactions

The most common adverse reactions are dry mouth, constipation, and dizziness...

5.8 Laboratory tests

There are no known effects of Avonza on laboratory tests...

5.9 Tolerability

Avonza is well tolerated in clinical studies...

5.10 Overdose

In the event of an overdose, patients should be monitored for symptoms...

5.11 Under-reporting

Patients should be encouraged to report all adverse reactions...

5.12 Medication errors

Patients should be advised to read the patient information leaflet carefully...

5.13 Abuse and dependence

Avonza is not considered to have any potential for abuse or dependence...

5.14 Withdrawal symptoms

There are no known withdrawal symptoms associated with Avonza...

5.15 Driving and operating machinery

Avonza may cause dizziness, which may affect the ability to drive...

5.16 Sensitivity to the excipients

Avonza contains several excipients, some of which may cause allergic reactions...

5.17 Other information

Avonza is a controlled substance and should be stored securely...

5.18 Environmental impact

Avonza should be disposed of according to local regulations...

5.19 Other information

Avonza is a registered trademark of Mylan.

6. PHARMACOLOGICAL PROPERTIES

6.1 Excipients

Avonza contains several excipients, some of which may cause allergic reactions...

6.2 Other information

Avonza is a controlled substance and should be stored securely...

6.3 Environmental impact

Avonza should be disposed of according to local regulations...

6.4 Other information

Avonza is a registered trademark of Mylan.

7. PHARMACOLOGICAL PROPERTIES

7.1 Therapeutic Indications

Avonza is indicated for the treatment of overactive bladder syndrome (OAB) in adults and adolescents...

7.2 Contraindications

Avonza is contraindicated in patients with known hypersensitivity to any of the active ingredients...

7.3 Special warnings and precautions for use

Avonza should be used with caution in patients with a history of urinary retention...

7.4 Interactions

There are no clinically significant interactions between Avonza and other drugs...

7.5 Pregnancy and lactation

There is no data on the use of Avonza in pregnant women...

7.6 Fertility

There is no data on the effect of Avonza on fertility...

7.7 Adverse reactions

The most common adverse reactions are dry mouth, constipation, and dizziness...

7.8 Laboratory tests

There are no known effects of Avonza on laboratory tests...

7.9 Tolerability

Avonza is well tolerated in clinical studies...

7.10 Overdose

In the event of an overdose, patients should be monitored for symptoms...

7.11 Under-reporting

Patients should be encouraged to report all adverse reactions...

7.12 Medication errors

Patients should be advised to read the patient information leaflet carefully...

7.13 Abuse and dependence

Avonza is not considered to have any potential for abuse or dependence...

7.14 Withdrawal symptoms

There are no known withdrawal symptoms associated with Avonza...

7.15 Driving and operating machinery

Avonza may cause dizziness, which may affect the ability to drive...

7.16 Sensitivity to the excipients

Avonza contains several excipients, some of which may cause allergic reactions...

7.17 Other information

7.18 Environmental impact

Avonza should be disposed of according to local regulations...

7.19 Other information

Avonza is a registered trademark of Mylan.

8. PHARMACOLOGICAL PROPERTIES

8.1 Therapeutic Indications

Avonza is indicated for the treatment of overactive bladder syndrome (OAB) in adults and adolescents...

8.2 Contraindications

Avonza is contraindicated in patients with known hypersensitivity to any of the active ingredients...

8.3 Special warnings and precautions for use

Avonza should be used with caution in patients with a history of urinary retention...

8.4 Interactions

There are no clinically significant interactions between Avonza and other drugs...

8.5 Pregnancy and lactation

There is no data on the use of Avonza in pregnant women...

8.6 Fertility

There is no data on the effect of Avonza on fertility...

8.7 Adverse reactions

The most common adverse reactions are dry mouth, constipation, and dizziness...

8.8 Laboratory tests

There are no known effects of Avonza on laboratory tests...

8.9 Tolerability

Avonza is well tolerated in clinical studies...

8.10 Overdose

In the event of an overdose, patients should be monitored for symptoms...

8.11 Under-reporting

Patients should be encouraged to report all adverse reactions...

8.12 Medication errors

Patients should be advised to read the patient information leaflet carefully...

8.13 Abuse and dependence

Avonza is not considered to have any potential for abuse or dependence...

8.14 Withdrawal symptoms

There are no known withdrawal symptoms associated with Avonza...

8.15 Driving and operating machinery

Avonza may cause dizziness, which may affect the ability to drive...

8.16 Sensitivity to the excipients

Avonza contains several excipients, some of which may cause allergic reactions...

8.17 Other information

Avonza is a controlled substance and should be stored securely...

8.18 Environmental impact

Avonza should be disposed of according to local regulations...

8.19 Other information

Avonza is a registered trademark of Mylan.

9. PHARMACOLOGICAL PROPERTIES

9.1 Therapeutic Indications

Avonza is indicated for the treatment of overactive bladder syndrome (OAB) in adults and adolescents...

9.2 Contraindications

Avonza is contraindicated in patients with known hypersensitivity to any of the active ingredients...

9.3 Special warnings and precautions for use

Avonza should be used with caution in patients with a history of urinary retention...

9.4 Interactions

There are no clinically significant interactions between Avonza and other drugs...

9.5 Pregnancy and lactation

There is no data on the use of Avonza in pregnant women...

9.6 Fertility

There is no data on the effect of Avonza on fertility...

9.7 Adverse reactions

The most common adverse reactions are dry mouth, constipation, and dizziness...

9.8 Laboratory tests

There are no known effects of Avonza on laboratory tests...

9.9 Tolerability

Avonza is well tolerated in clinical studies...

9.10 Overdose

In the event of an overdose, patients should be monitored for symptoms...

9.11 Under-reporting

Patients should be encouraged to report all adverse reactions...

9.12 Medication errors

Patients should be advised to read the patient information leaflet carefully...

9.13 Abuse and dependence

Avonza is not considered to have any potential for abuse or dependence...

9.14 Withdrawal symptoms

There are no known withdrawal symptoms associated with Avonza...

9.15 Driving and operating machinery

Avonza may cause dizziness, which may affect the ability to drive...

9.16 Sensitivity to the excipients

Avonza contains several excipients, some of which may cause allergic reactions...
