## LEAFLET

# ALUCID

## (Aluminium Hydroxide Tablets BP 500 mg)

### Composition:

Each chewable tablet contains: Aluminium Hydroxide BP 500 mg

### Action:

Aluminium Hydroxide is used as antacid. It is also used as a phosphate binding agent in patients with renal failure, although absorption of accumulation of aluminium in these patients can lead to severe toxicity with encephalopathy and osteomalacia which limits this use. Its main adverse effect when used as antacid composition.

### Indications:

For dyspepsia, hyperphosphataemia.

### Dosage:

1-2 tablets chewed 4 times daily and at bedtime or as required.

### Side Effects:

Aluminium Hydroxide is common with other Aluminium compounds is astringent and may cause nausea, vomiting and constipation; large dose can cause intestinal obstruction.

### Contraindications:

Hypophosphataemia, porphyria

### Precaution:

Excessive dose or even normal doses in patients with low phosphate diets may lead to phosphate depletion accompanied by increase resorption and urinary excretion of calcium with risk of osteomalacia.
