LEAFLET

AGOFORMIN

Metformin Tablets BP 500 mg

Each film coated tablet contains:-
Metformin Hydrochloride BP 500 mg.

Metformin are completely different from the hypoglycaemic sulfonamides both in its structure and its mode of action. It cause little or no hypoglycaemia in that they interfere with mitochondrial respiratory chains-promote peripheral glucose utilization by enhancing anaerobic glycolysis.

Indications:

Maturity onset (non-insulin dependent) obese diabetics, in whom diet alone has failed. Very unstable maturity onset diabetics. Where a combination & insulin and metformin is beneficial.

Contra-indications:

1. Renal failure
2. Cardiovascular collapse
3. Diabetic Ketoacidosis
4. Severe hepatic insufficiency.

Special Precautions:

Patient should not consume alcohol as there is an interaction between Metformin and alcohol which could lead to increased risk of lactic acidosis.

Side effects: G.I. disturbances tolerance, Lacticacidosis.
