

Description

Ibumex tablets are available as round, sugar-coated, pink coloured tablets containing 200mg of Ibuprofen BP.

Ibumex suspension is an orange coloured, pleasantly flavoured liquid containing 100mg of Ibuprofen BP in 5ml.

Indications

Ibuprofen is a non-steroidal anti-inflammatory drug with analgesic, anti-inflammatory and anti-pyretic actions. Ibuprofen tablets are used for the relief of pain associated with low backache, tendonitis and frozen shoulder. It can also be used in soft tissue injuries like sprains and strains. The analgesic effect of Ibuprofen makes it of use to relieve pain associated with mild to moderate toothache and headache. Ibuprofen suspension is indicated for the reduction of fever and for the relief of mild to moderate pain in children older than one year.

Dosage and Administration

Ibuprofen should be taken three to four times a day, preferably after food, as indicated below.

Adults and Children over 12 years

One to two Ibumex tablets
