VITA-1

(Thiamine Tablets BP 50mg)

COMPOSITION :
Each uncoated tablet contains :
Thiamine Hydrochloride BP 50mg

ACTION :
Thiamine is an essential coenzyme for carbohydrate metabolism. Thiamine deficiency develops when the dietary intake is inadequate severe deficiency leads to the development of syndrome known as 'beri-beri.'

INDICATIONS :
Thiamine is used in the treatment and prevention of Thiamine deficiency.

DOSAGE :
In the treatment of mild chronic Thiamine deficiency doses of up to 30mg daily in single or divided dose have been recommended. In severe thiamine deficiency doses of upto 300mg daily have been given.

PRECAUTION :
Adverse effects seldom occur following administration of thiamine but hypersensitivity reactions have occurred mainly after parantel administration. These reactions have ranged in severity from very mild to, very rarely, fatal anaphylactic shock. Severe thiamine deficiency has been reported with in a relatively short time of the initiation of thiamine free total parantel nutrition; some death occurred.

WARNING :
Do not exceed the stated doses.

STORAGE :
Store under normal storage conditions (15° C to 30° C)
Keep all medicines out of reach of children.

PRESENTATION :
500 Tablets and 1000 Tablets Jars
Blister Pack of 10 X 10 Tablets.
