

PACKAGE LEAFLET: INFORMATION FOR THE USER

CLOTRIMAZOLE CREAM BP 1 % w/w CANI-MAKS

Read all of this leaflet carefully because it contains important information for you.

This medicine is available without prescription to treat minor conditions. However, you still need to use it carefully to get the best results from it.

- Keep this leaflet, you may need to read it again
- If you have any further questions, ask your doctor or pharmacist
- You must contact a doctor if your symptoms worsen or do not improve after 7 days
- If you get any side effects, talk to your doctor or pharmacist. This includes any possible side effects not listed in the leaflet. See section 4

What is in this leaflet

1. What CANIMAKS is and what it is used for
2. What you need to know before you use CANIMAKS
3. How to use CANIMAKS
4. Possible side effects
5. How to store CANIMAKS
6. Contents of the pack and other information

1. What CANIMAKS is and what it is used for

It is a broad spectrum antifungal medicine used to treat skin infections such as

- All dermatomycoses due to moulds and other fungi (e.g. Trichophyton species).
- All dermatomycoses due to yeasts (Candida species).
- Skin diseases showing secondary infection with these fungi.
- Candidal nappy rash, vulvitis and balanitis.

2. What you need to know before you use CANIMAKS

Do not use **CANIMAKS** if you (or your baby if treating nappy rash) are allergic to clotrimazole or any of the other ingredients of this medicine (listed in section 6)

Talk to your pharmacist or doctor:

- If you have psoriasis (dry, scaly skin) or other serious skin conditions

- If you are breastfeeding

CANIMAKS contains cetostearyl alcohol.

This product contains cetostearyl alcohol, which may cause local skin reactions (e.g. contact dermatitis)

Other medicines and CANIMAKS .

Laboratory tests have suggested that, when used together, this product may cause damage to latex contraceptives. Consequently the effectiveness of such contraceptives may be reduced. Patients should be advised to use alternative precautions for at least five days after using this product.

3. How to use CANIMAKS

There is no separate dosage schedule for the young or elderly.

The cream should be applied thinly 2-3 times daily and rubbed in gently. A strip of cream (½ cm long) is enough to treat an area of about the size of the hand. Treatment should be continued for at least one month for dermatophyte infections and at least two weeks for candidal infections. If the feet are infected they should be washed and dried, especially between the toes, before applying the cream.

4. Possible side effects

As the listed undesirable effects are based on spontaneous reports, assigning an accurate frequency of occurrence for each is not possible.

Immune system disorders: allergic reaction (syncope, hypotension, dyspnea, urticaria).

Skin and subcutaneous tissue disorders: blisters, discomfort /pain, oedema, erythema, irritation, peeling/exfoliation, pruritus, rash, stinging/burning.

5. How to store CANIMAKS

Do not store above 30° C. Protect from light.

Do not freeze. Do not accept if seal is broken.

Puncture nozzle with piercing point of the cap.

Keep the tube tightly closed after use.

Keep the medicine out of reach of children.

For external use only.

6. Contents of the pack and other information
