When using this product your child may have rectal discomfort or a burning sensation.

May cause irritation and occasionally abdominal cramps, swelling and loose stools.

4.9 Overdose

Over dosage via rectal route is unlikely. However, if ingested treat symptomatically.

5. Pharmacological properties

5.1 Pharmacodynamic properties

Glycerin is commonly classified as an osmotic laxative but may act additionally or alternatively by promoting peristalsis and evacuation of the lower bowel by virtue of a mild irritant effect. Glycerin suppositories possess also lubricating and faecal softening actions. Glycerin exerts a hyperosmotic laxative effect by attracting water into the rectum, thereby relieving constipation.

5.2 Pharmacokinetic properties

Glycerin is readily absorbed from the intestine and undergoes extensive metabolism principally in the liver, it may be used in the synthesis of lipid, metabolized to glucose or glycogen, or oxidized to carbon dioxide and water. It may also be excreted in the urine unchanged.

5.3 Preclinical safety data

There are no preclinical data of relevance to the prescriber, which are additional to those already included in other sections of the SmPC.

6. Pharmaceutical particulars

6.1 List of excipients

Sodium Stearate, Purified water.

6.2 Incompatibilities

Not Applicable.

6.3 Shelf life

36 months

6.4 Special precautions for storage

Store below 30°C & protect from light.

6.5 Nature and contents of container

Finished product is packed in Aluminium/Polyethylene Foil. 2 Strips of 5 suppositories is packed in carton along with pack insert.

6.6 Special precautions for disposal and other handling

None.

7. Marketing authorization holder

Bliss GVS Pharma Ltd.

102, Hyde Park, Saki-Vihar Road, Andheri (East), Mumbai – 400072.
